ABOUT ME

I am very passionate about the development space. Outside of family responsibilities, I take every opportunity to develop my skill sets. I am motivated by and love the challenges that come with learning new technologies.

I have grown to be a powerful force in the projects that I take on. I quickly learn, adapt and understand the needs of the client, or task, and work to get it done proficiently. I am a great team player and I work well with others to deliver the best product possible. I have worked on a variety of projects varying in server technologies, languages, hosting environments, guidelines and deadlines. I have not taken on a project I could not complete. If I do not immediately know an answer, or have a solution, I use many tools and resources available to find the solution and implement it quickly. I am a go-getter and will deliver on what I promise.

Skill and understanding in ASP.NET, VB.NET, C#, NodeJS, JavaScript, jQuery, AngularJS, HTML/5, CSS/3, MSSQL, MySQL, PostgreSQL, Redis, MongoDB, AWS, Unity 2D & 3D, Windows Operating Systems, Mac Operating Systems, Linux Operating Systems and more.
